BORCAD®

An innovative solution provided by BORCAD - integration of a colposcope in the GRACIE chair reduces spatial demands and increases convenience for the physician during the examination.

LCD monitor allows it connecting to ultrasound.

Instrument trolley saves space in the surgery and provides for the physician's maximum convenience when working.

Mobile wire-less foot controller for comfortable adjustment of an access, examination and ultra-sound position from any place within the doctor's surgery.

Using one of memory functions allows fluent setting up the gynaecological chair GRACIE to a couch for abdominal ultra-sound examination.

www.gracie.eu

Massage segment (contributes to greater comfort and calmness for woman).

Adjusted lumbar support

Easy cleaning

The concept of leg holders enables very quick and unique adjustment of leg holders to required position.

One person and only with one hand can manually adjust this part to several secured working positions and fast slid the footrest under the loading part of bed.
